WIRELESS

The EM-702 was designed in an audiophile approach to ensure the high fidelity amater a faithful reproduction of his favourite music in a compact format. It delivers a power of 2x25W RMS into 8Ω and 2x35W into 4Ω.

It includes a CD player (MP3/WMA) as well as FM RDS and AM tuner with 40 station presets. Its USB slot allows you to play your digital files on USB key in MP3 and WMA formats.

The EM702 includes a WIRELESS receiver allowing you to listen to music from your smatphones and talbets. It has one anolog audio input (RCA Stereo), 1 digital input (Optical and / or Coaxial conections) allowing it to connect to TVs last generation.

Finally, it provides a Subwoofer output to connect an active subwoofer.

Digital Inputs: The OPTICAL connector will override the source connected to COAXIAL, unless the source connected to the optical connector is turned off. In this case, you can listen to the source connected in coaxial.
