Made with premium quality standards, the EX-602.3 CD player was designed for the high-fidelity audiophile; ensuring a faithful reproduction of his favourite music.

The mechanics is found on the CD players of the most famous brands usually at much higher prices.

The EX-602.3 is capable of reading all CD-R/W and MP3 files up to 320Kbps.

It has a digital-to-analog audio converter for high-quality music.

MAIN FEATURES

- Ultra rigid frame for better stability of the mechanical
- USB slot (MP3) in front
- Digital outputs: Optical and Coaxial
- Analog power supply (no switching power supply)
- Separate regulators for digital and analog mechanics

DAC: The S/PDIF input is interfaced to a Cirrus Logic CS8415 chip and analog digital conversion is supported by a CS4334 circuit from the same manufacturer. Maximum sampling is 24 bits on the 96 kHz for coaxial and optical inputs.
